PREFACE

This is the Sixth Issue of the 'Agricultural Prices in India'. It describes the position of Agricultural Prices during 1955. It also gives statistical tables on different types of prices in respect of various agricultural commodities. The data have been collected from a variety of sources *e. g.* State Bulletins, Journals and Gazettes, Publications of other Ministries, F.A.O. etc., and should, therefore, be utilised with great care. Any views expressed in the Introductory Note should not be taken as those of the Govt. of India. The arrangement of tables in this issue has been recast with a view to presenting the data in a more rational way and avoiding any duplication. Thus separate State-wise tables have been omitted and the information has been incorporated in Commodity tables. This does not, however, affect in any way the comparable nature of the data. The detailed work involved in the preparation of this publication has been done in the Agricultural Prices of this Directorate.

NEW DELHI.
August, 1956.

S. R. SEN,
*Economic and Statistical Adviser,
Ministry of Food and Agriculture.*

AGRICULTURAL PRICES IN INDIA, 1955

INTRODUCTORY NOTE

The trend of prices in the year 1955 exhibited two distinct phases. During the first phase, which lasted till May, 1955, the downward trend in wholesale prices, noticed since September, 1953, continued almost uninterrupted. The general index of wholesale prices during the first five months of the year recorded a fall of about 22 points and at 342 at the end of May, 1955 it touched the lowest level since March, 1948. This general downward trend, however, was reversed at the beginning of June, 1955 and the second phase of upward trend continued throughout the remaining part of the year. The general index of wholesale prices after touching the lowest level of 342 continued to rise and at the end of the year stood at 368.4, recording thereby a rise of about 26 points during the seven months' period beginning from June.

It will be recalled that the record crop during 1953-54 set in the downward trend from September, 1953 and the sharp and sudden fall in prices of foodgrains necessitated the adoption of a limited price support policy by the Government in 1954 in respect of coarse grains—bajra, jowar and maize, which was later extended to wheat, gram and rice. The easy supply position of foodgrains further enabled the Government to remove the last remnants of control on 18th March, 1955 when the inter-zonal restrictions on movement of wheat were abolished. The favourable food situation also made it possible for the Government to permit the export of jowar, maize and pulses in 1955, besides rice and wheat products which were allowed for export in 1954. In order to arrest the fall in prices below the specified minima, the Government had also to enter into the market and purchase jowar, maize and wheat in several States. This action of the Government produced the desired result and assisted, in a way, the reversal of the price trend from the middle of 1955. Since then prices continued to harden and by the end of the year the General Index of Wholesale Prices, as mentioned earlier, rose by about 8 per cent as compared to the level reached in May, 1955. Besides the selective price support policy of the Government, several other basic factors were responsible for the setting in and continuance of the upward trend of prices since the middle of June, 1955. The lower production of cereals during 1954-55 and the damage caused to Kharif crops of 1955-56, resulting in apprehensions of a lower output as compared to 1954-55, brought about a change in the supply and demand position. The liberal export policy in respect of foodgrains and industrial raw materials, inventory build-up, unwarranted speculative tendency in the market, rise in the consumption demand of foodgrains as a result of rise in incomes of people, increase in the money supply with the public due to higher levels of investment expenditure during the closing years of the First Plan and expectations of larger doses of deficit financing during the Second Plan period, further helped the bullish sentiments in the market.

Several measures were taken by the Government during the course of the year for arresting the sudden and sharp spurt in the prices of foodgrains which was giving rise to an inflationary psychology. The exports of foodgrains and other raw materials were restricted and in some cases banned completely. Stocks of wheat were released freely by the Government for sale in Calcutta, Delhi and Bombay at a lower price, of Rs. 14 per maund,

to reduce the pressure on areas from which these centres drew their supplies as well as to meet the increased demand of these large consuming centres. Arrangements were also made for effecting larger imports. These measures bore some fruit and the food articles index remained at a lower level during September and October as compared to August, 1955. In November, 1955, however, the food articles index increased by about 11 points but in December it declined by 3 points and stood at 323.7.

FOODGRAINS

The production of foodgrains (cereals and pulses) in 1954-55 was lower than in the previous years by about 2 million tons though it exceeded the First Plan target of 61.6 million tons by about 5 million tons. As mentioned earlier, this decline in the production of foodgrains led to the setting in of the upward trend in prices from the middle of the year. The damage caused by floods, droughts, etc., to 1955-56 crop assisted further the rising trend in prices and the apprehensions of short supply of foodgrains in the market. The decline in the production of foodgrains (cereals and pulses) during 1954-55 was mainly accounted for by a short fall in the output of cereals from 58.3 million tons to 55.7 million tons; rice alone accounted for a decline of more than 3 million tons from 27.8 million tons to 24.5 million tons. As a result of the successive short-fall in the production of cereals during 1954-55 and 1955-56, the prices of foodgrains registered a significant rise and the Government action, which in the latter part of 1954 and in the first half of 1955 was directed towards arresting the price decline and protecting the interest of cultivators by price support measures, had to be changed to a policy of arresting the continuous rise in prices.

The trend of prices of individual commodities is discussed below:

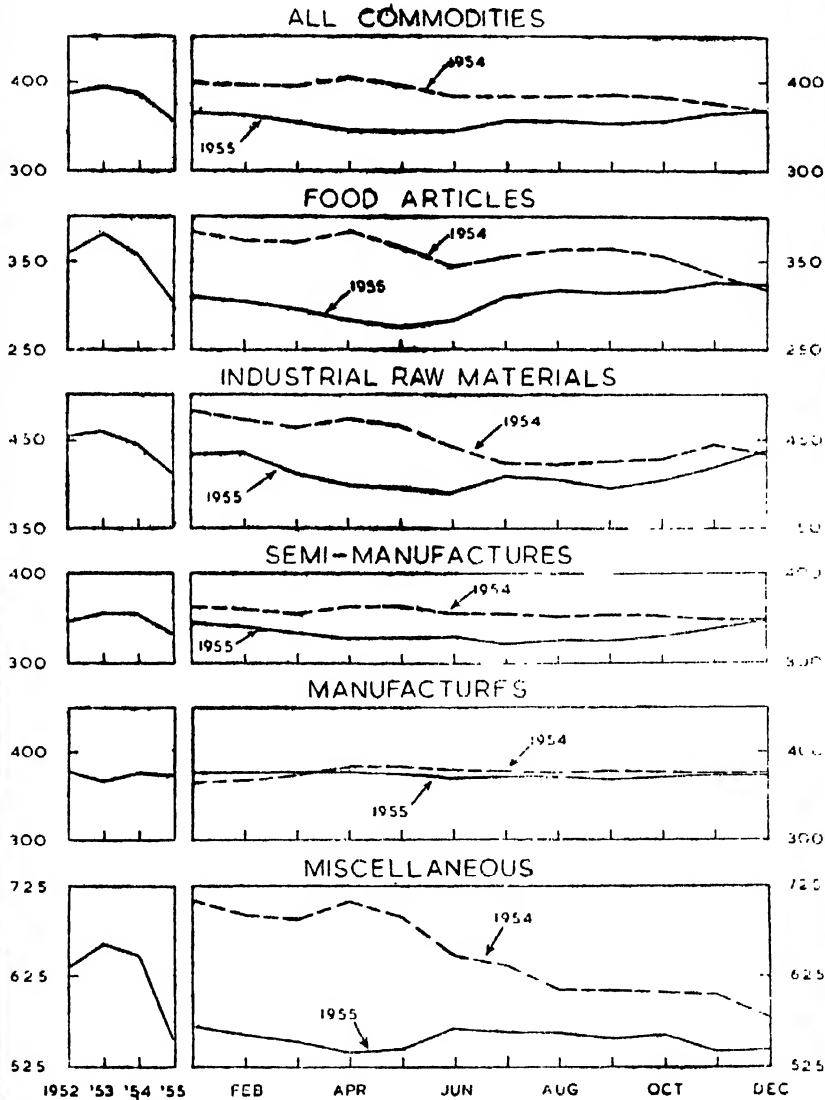

RICE

The production of rice during 1954-55 amounted to 24.5 million tons as against 27.8 million tons in 1953-54, thereby showing a fall of 11.7 per cent. With the arrival of the new crop in the market, prices of rice during January, 1955 declined significantly. During February and March, 1955, however, they ruled more or less steady with a firm undertone. In February, 1955 export of rice was permitted from all ports and the export duty on rice which had been raised to 20 per cent *ad valorem* was reduced to 2 as. 3 pios. per maund. This had a temporary steadying effect on the market. The prices again took a downward turn by the middle of April and in May touched very low levels in some centres. Thereafter, the trend was reversed and prices of rice continued to rise till September, 1955 when the Economic Adviser's Index of wholesale prices for rice stood at 509 as against 403 in May 1955. In August, 1955 the Government of India announced its decision to make purchases of coarse rice, as a measure of price support, at selected *mandis* if the price of that quality fell below Rs. 11 per maund. No purchases of rice were, however, made on Government account as prices did not fall below the specified minimum. With the arrival of the new rice crop in the market, the prices declined from the high level reached in September, 1955 and at the end of the year wholesale price Index of Rice stood at 463 as against 424 in December 1954.

Prices of rice at individual markets also exhibited more or less the same upward trend since the middle of the year as exhibited by the Wholesale Price Index Numbers. In Andhra, rice market, was slightly firm upto the end of March but ruled easy thereafter till the end of June. From July onwards, prices of rice in Andhra showed a hardening tendency. In Bihar, prices remained, more or less, steady upto the middle of the year.

INDEX NUMBERS OF WHOLESALE PRICES-BY GROUPS

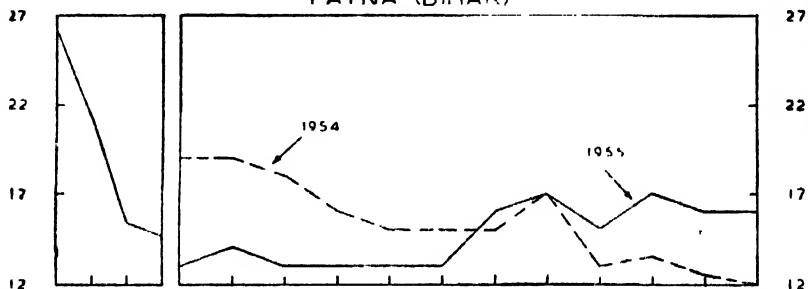

BASE: YEAR ENDED AUGUST 1939=100

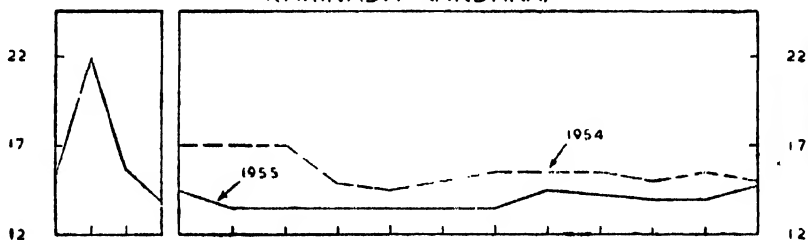

RICE WHOLESALE PRICES

RUPEES PER STANDARD MAUND

PATNA (BIHAR)

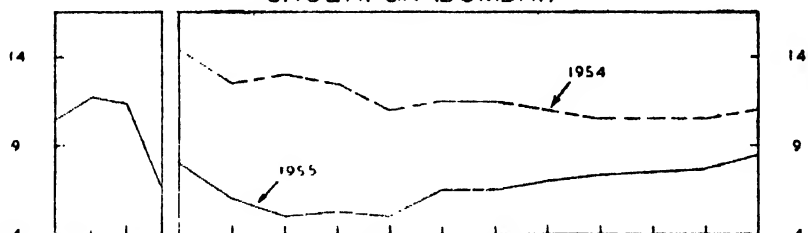

KAKINADA (ANDHRA)

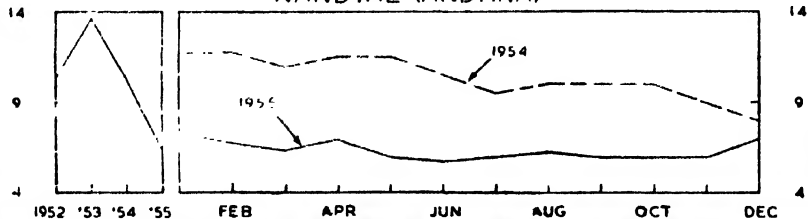

JOWAR WHOLESALE PRICES

RUPEES PER STANDARD MAUND

SHOLAPUR (BOMBAY)

NANDYAL (ANDHRA)

During the latter part of the year they tended to rise. At Patna the price remained, more or less, steady at Rs. 13 per maund during the half year ending June, 1955. Thereafter, the prices rose to Rs. 16 per maund at the end of December. In Madras, Prices remained, more or less, steady upto May and slightly firmed up in July. There was an easy tendency during August and September but the prices hardened again in November and December. At Calcutta, the prices remained, more or less, steady upto the middle of the year but increased thereafter till October, 1955 after which an easy tendency was witnessed. At Contai, prices of rice ruled steady upto the middle of the year but rose thereafter and in December, 1955 price of coarse rice was quoted at Rs. 16-8-0 as against Rs. 15 in May, 1955. At Kanpur, in U. P., rice price stood at Rs. 13-8-0 in March, declined to Rs. 12-8-0 in May and rose thereafter to Rs. 14-8-0 in December, 1955.

WHEAT

A record production of 8·8 million tons of wheat in 1954-55 as against 7·9 million tons in 1953-54 led to an easing of price position of wheat during the first half of 1955. The downward trend in wheat prices, which became manifest in 1954, continued till the end of May, 1955. Inter-State and inter-Zonal restrictions on the movement of wheat and its products were completely abolished with effect from the 18th March, 1955. To arrest the sharp fall in prices of wheat, the Government of India announced in April, 1955, their decision to purchase wheat from the cultivators at rail-head *mandis* at Rs. 10 per maund in principal wheat-growing States. In pursuance of this decision, about 76·4 thousand tons of wheat were purchased in the States of Madhya Pradesh, Punjab, U. P., Madhya Bharat, Bhopal and Vindhya Pradesh. Following these purchases, the downward trend in wheat prices was reversed in July, 1955 and thereafter prices rose steadily till the end of the year. In fact, as mentioned earlier, the Government's policy in the latter half of the year was directed towards arresting the abrupt rise in prices and in the case of wheat, stocks from Government godowns were released freely towards the close of the year in Bombay, Calcutta and Delhi; for sale in the market at a lower price of Rs. 14 per maund.

The Economic Adviser's Index Numbers of wholesale prices for wheat which stood at 498 in January, 1955 declined to a low figure of 352 in May, but rose steadily thereafter and reached 506 in December, 1955. The prices at individual centres also revealed more or less the same trend. Thus, at Ludhiana in Punjab, price of wheat steadily declined from Rs. 14-6-0 in January, 1955, to Rs. 9-14-0 in May, and rose thereafter to Rs. 11-12-0 in August and Rs. 14-8-0 per maund in December, 1955. At Hapur, price of average quality wheat declined from Rs. 13-6-0 in January, 1955 to Rs. 9-10-0 per maund in May, 1955 and advanced to Rs. 14-4-0 per maund in December, 1955. At Patna, in Bihar, wheat prices declined from Rs. 17 at the end of December, 1954 to Rs. 12 in May, 1955, but rose thereafter to Rs. 15-8-0 per maund in December, 1955. In Madhya Pradesh, prices of wheat declined from Rs. 13-8-0 at Sagar in January, 1955 to Rs. 9-14-0 in April; thereafter, they rose to Rs. 16 per maund in December, 1955. Prices of Punjab wheat at Calcutta in West Bengal declined from Rs. 16 in January, 1955 to Rs. 11-8-0 in May, 1955 but firmed up thereafter to quote at Rs. 16 per maund in December, 1955.

BARLEY

Barley prices revealed, more or less, the same tendency as wheat during 1955. There was an easy trend in barley prices upto the end of May when they touched low levels in most of the States. Since June, 1955, however, prices tended to harden and in December there was a spurt in prices. Thus at Moga in Punjab prices of coarse variety of barley declined to Rs. 4-4-0 per maund in April, 1955; but thereafter rose to Rs. 6 in September, 1955

and further to Rs. 9 per maund in December, 1955. At Hapur, in U.P., the price of F.A.Q. variety of barley in December, 1955 stood at Rs. 9-8-0 as against Rs. 5-2-0 in April, 1955 and Rs. 6-8-0 per maund in January, 1955.

MILLETS AND MAIZE

In the latter part of 1954 there was a sharp and abrupt fall in the prices of millets and maize in certain areas. This led to the adoption of the policy of limited price support and resumption of exports of small quantities of jowar and maize. In December, 1954, the Government of India announced that, as a measure of relief, in certain isolated areas where the prices of jowar, bajra and maize had fallen to low levels, they would be prepared to purchase from the cultivators these foodgrains at Rs. 5-8-0, Rs. 6 and Rs. 5-8-0 per maund, respectively. When the prices threatened to fall below these minimum levels, the Government entered into the market and purchased about 37·8 thousand tons of jowar in the States of Bombay, Madhya Pradesh, Uttar Pradesh, Madhya Bharat, Rajasthan, Vindhya Pradesh and Bhopal. In the case of maize, only a small quantity was purchased in the State of Bombay. No purchases of bajra were made as prices in practically all centres remained above the specified minimum. The limited prices support policy for jowar, bajra and maize was extended in September, 1955 to the 1955-56 Kharif crops when the same support prices for these grains as were in force in 1954-55, were announced by the Government.

Largely, as a result of these measures, the fall in the prices of millets and maize was arrested and from the middle of 1955 a hardening tendency set in. The Economic Adviser's Index Number of wholesale prices of jowar which stood at 136 in January 1955 declined to a low figure of 97 in May, 1955. This led to a release of some quantity of jowar for export in June, 1955. Jowar prices rose steadily thereafter and at the end of the year the Economic Adviser's Index stood at 133 in December, 1955. Similarly, Bajra Index in May, 1955 came down to 194 from 203 in January, 1955 but started gaining ground from June and stood at 241 in December, 1955. Maize prices at Naugachia in Bihar declined from Rs. 7 per maund in January, 1955 to Rs. 6-8-0 per maund in May, 1955, but rose to Rs. 10-4-0 per maund in December, 1955. At Chandausi in U.P., maize price in May declined to Rs. 5 per maund but advanced thereafter to Rs. 9-8-0 per maund. Prices of jowar at Nandyal, in Andhra, showed an easy tendency upto June when it was quoted at Rs. 5-12-0 per maund, but thereafter rose steadily and stood at Rs. 7 per maund in December, 1955. At Akola, in Madhya Pradesh, jowar price rose to Rs. 9-8-0 per maund in December, 1955, as against Rs. 5-4-0 in April, 1955 and Rs. 6 per maund in January, 1955. Bajra prices also showed an easy trend upto the middle of 1955; but, thereafter, they hardened. At Ahmednagar, in Bombay, Bajra price declined to Rs. 8 per maund in May from Rs. 9-8-0 per maund in January, 1955; but hardened thereafter and in December, 1955, the medium variety of bajra was quoted at Rs. 12 per maund. At Agra, in U.P., the price of F.A.Q. variety of Bajra stood at Rs. 11-12-0 per maund in December, 1955 as against Rs. 6 per maund in April and Rs. 7-8-0 in January, 1955.

Thus, on the whole, allowing for seasonal variations, prices of millets and maize declined generally upto the middle of the year 1955 but rose during the second part of the year partly in sympathy with the prices of other important foodgrains and partly due to severe damage caused to coarse grains crops by floods and heavy rainfall.

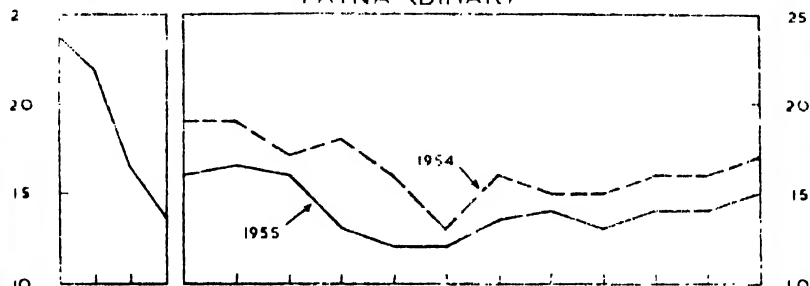

RAGI

In the case of ragi, the declining tendency in the prices noticed during the latter part of 1954 continued upto the middle of 1955. During July, 1955, there was a sudden spurt in ragi prices; thereafter the market became easy and prices took a downward trend thorough

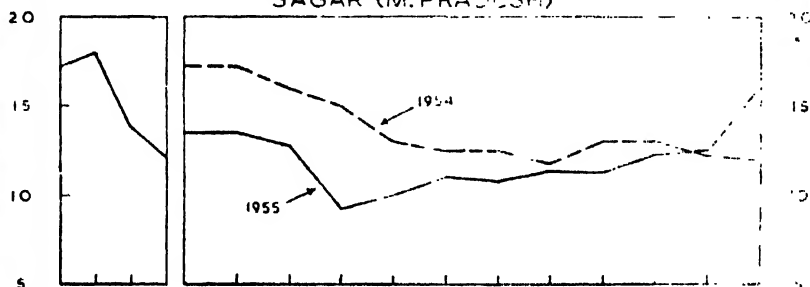

WHEAT WHOLESALE PRICES

RUPEES PER STANDARD MAUND

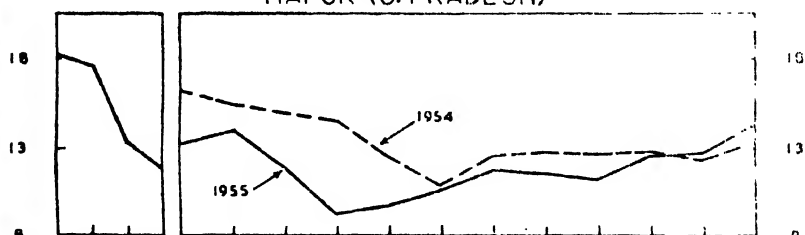

PATNA (BIHAR)

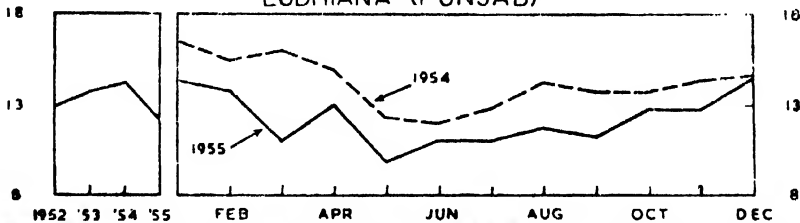

SAGAR (M. PRADESH)

HAPUR (U. PRADESH)

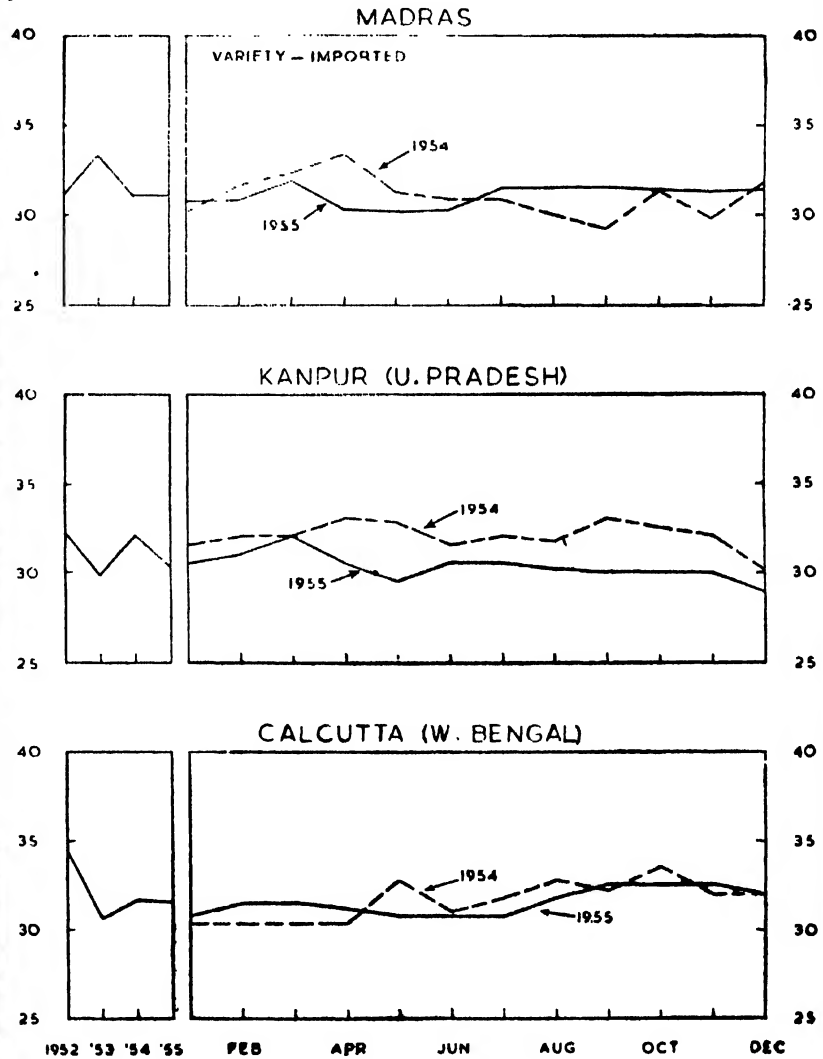

LUDHIANA (PUNJAB)

SUGAR CRYSTAL

WHOLESALE PRICES

RUPEES PER STANDARD MAUND

the pace of decline was not uniform in all the ragi producing States. On the whole, ragi prices during 1955 were on the decline. The price of 2nd sort of ragi at Madnapalli which stood at Rs. 8 per maund in January, 1955 declined to Rs. 7 in May and further to Rs. 5 per maund in December, 1955. At Ghoti in Bombay prices rose to Rs. 9-8-0 in July, 1955 from Rs. 7 per maund in April, 1955, but declined thereafter in December, 1955, and stood at Rs. 8 per maund. At Bangalore, in Mysore, ragi price was quoted at Rs. 7-2-0 per maund in December, 1955 as against Rs. 8-8-0 in July, 1955, Rs. 7 in June and Rs. 8-10-0 per maund in January, 1955.

GRAM

A good harvest of 5·4 million tons of gram in 1954-55 tended to cause a decline in prices and by May, 1955 the Wholesale Price Index of Gram had fallen by 24 points as compared to January, 1955. The Government of India allowed free export of gram from 23rd March, 1955. In order to give further support to gram prices, the Government of India announced on 10th June, 1955, a minimum price of Rs. 6 per maund for gram and their decision to purchase it in case prices fell below that level. Following this announcement there was a steady rise in gram prices. The Economic Adviser's Index Number of Wholesale Prices for gram which had gone down to 176 in May, 1955 rose thereafter and stood at 242 at the end of the year.

Prices of gram declined at Rohtak in Punjab from Rs. 6-8-0 in January to Rs. 5-6-0 in May, 1955 but rose thereafter to Rs. 7-10-0 per maund in December, 1955. At Kanpur, in U.P., gram prices stood at Rs. 10-8-0 per maund in December, 1955 as against Rs. 6-4-0 in May, and Rs. 7-10-0 per maund in January, 1955.

SUGAR AND GUR

Sugar—The year 1954-55 was a turning point in the production of crystal sugar in India. After a sharp decline in the production of sugar in 1952-53 and 1953-54, the production in 1954-55 reached a high level of 15·90 lakh tons. This phenomenal increase in production was made possible by a larger area under cane, better crop production and more cane being made available to sugar factories owing to low prices of gur. As in earlier two years there was no control over the prices, movement and distribution of sugar in 1954-55 except that in the beginning, 25 per cent of the production was required to be kept by the factories in reserve. Due to easy supply and price position this reserve was also later released for free sale. The minimum price of sugarcane was fixed at the previous year's level, i.e. Rs. 1-7-0 per maund for gae delivery and Rs. 1-5-0 per maund for sale at rail centres.

As a result of good sugarcane harvest in 1954-55, production of gur recorded a significant increase and prices tended to fall to uneconomic levels. Export of gur was licensed freely from January, 1955. The Government of U.P. also announced a support price of Rs. 10 per maund for gur which had a stimulating effect on the market.

The prices of sugar, throughout 1955, maintained a *reasonable* level which was attributable to increased production and larger availability of imported and indigenous sugar in the internal market. In spite of an upward revision of the excise duty on sugar by Rs. 1-6-0 per maund with effect from 1st March, 1955, the sugar prices did not register any significant rise and fluctuated between Rs. 30-9-0 and Rs. 33-10-0 per maund in Bombay, Rs. 30 and Rs. 33 per maund in Patna, Rs. 29 and Rs. 32 per maund in Kanpur, and Rs. 30-8-0 and Rs. 32-8-0 per maund in Calcutta. The Economic Adviser's Index Number of Wholesale Prices of sugar fluctuated within narrow limits and at the end of 1955 stood at 258 as against 270 in the beginning of the year.

The prices of Khandsari and gur generally followed the same pattern as those of sugar. In 1954-55, the trend in prices of Khandsari was generally downward though towards the closing months of the season a certain degree of firmness developed in some centres. Gur prices recorded a very sharp fall towards the close of the year 1954 and the same tendency continued in the beginning of the year 1955. The Government of India's decision to allow export of cane jaggery and cane jaggery powder freely and the U.P. Government's announcement to step into the market and purchase gur at Rs. 10 per maund, in areas where prices tended to fall below that level, had salutary effect on the market. Thus, at Hapur, the prices of gur which stood at Rs. 9-8-0 per maund on the 29th January, 1955, rose to Rs. 10-4-0 per maund on 5th February, 1955. During the remaining months of the 1954-55 season the prices of gur ruled generally steady, though in October, 1955, abrupt rise in gur prices was noticed at certain centres, viz., Patna, Bombay and Calcutta.

OILSEEDS AND VEGETABLE OILS

The increased yield of oilseeds crops during 1953-54 and 1954-55 led to a decline in the prices of oilseeds, vegetable oils and oilcakes during 1954. Consequently, the Economic Adviser's Index Number of Wholesale Prices of Oilseeds fell to 168 in 1954 from 573 in 1953. The downward trend in the prices persisted during the first three quarters of 1955 also and the average index number of wholesale prices of oilseeds as a group fell to 370 in 1955. With a view to affording some support to low internal prices, a liberal export policy was adopted in respect of vegetable oils in 1954 and this was continued during 1955 also. Even export of oilcakes which was banned for over a decade came to be permitted during February, 1955. Sizeable export quotas of H.P.S. groundnuts, groundnut oil and oilcakes were announced while the policy of free licensing of exports of castor oil, linseed oil and mustard oil was continued. Small quotas of sesamum seed and sesamum oil were also permitted for export in May, 1956. While the export duty on sesamum seed was maintained at Rs. 150 per ton that on sesamum oil was reduced from Rs. 300 to Rs. 75 per ton. Export quotas of cotton seed oilcake, niger and kardi oilcakes, coconut oilcakes and other oilcakes were also released in a liberal way. Besides, export duty on cotton seed oil, niger cake, kardi cake and castor cake was abolished w.e.f. 3rd May, 1955 and that on decorticated and undecorticated varieties of cotton seed oilcake was brought down to a uniform level of Rs. 30 per ton w.e.f. the same date; prior to 3rd May, 1955, the decorticated variety was subject to an export duty of Rs. 100 per ton and the undecorticated variety to Rs. 50 per ton.

Towards the end of 1955, the prices of vegetable oils in India tended to move up rather sharply. At the end of December, 1955, the Economic Adviser's Index Number of Wholesale Prices of Oilseeds as a group stood at 431 as compared to 323 in April of the same year the lowest during 1955 and 373 points in January, 1955. The reasons responsible for this trend were trade expectations of a considerable shortfall in the groundnut, rape and mustard and sesamum crops of the 1955-56 season. An important reason for the upward movement of linseed and castor oil prices was large exports of these oils during 1955.

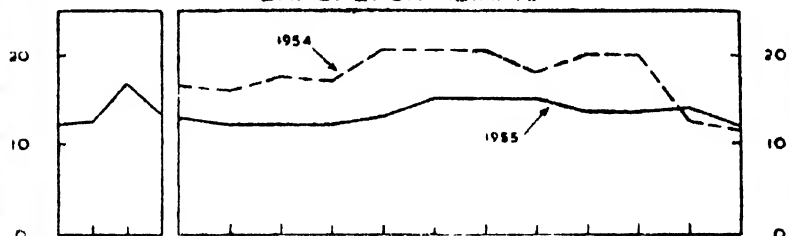

COPRA AND COCONUT OIL

There were violent fluctuations in the prices of copra and coconut oil during 1955 though as compared to 1954, the prices of these items were slightly lower. The reason for such a behaviour of the prices was comparatively easy supply position of copra and coconut oil during 1955. The prices of coconut oil at Bombay ruled between Rs. 52-5-0 and Rs. 61-7-0 per maund, while at Madras the range was between Rs. 51 and Rs. 58-2-0 per maund. In order to help the stabilization of copra and coconut oil prices at a reasonable

level, the import quota for established importers of coconuts, copra and coconut oil was reduced to 75% for the half year July-December, 1955 as against 100 basis in preceding few half years.

GROUNDNUT

The fall in the prices of groundnut witnessed during 1954 continued upto April, 1955. The All-India index of wholesale prices of groundnut kernels fell from 606 in January, 1954 and 409 in December, 1954 to 350 at the end of April, 1955. During the months May and August, the index advanced by 55 points to 405. During September and October, the index again registered a decline of 16 points. During the next two months, the index improved to 431 points the highest during the year. The bold variety at Bombay touched the low level of Rs. 14-14-0 per maund in January, 1955. Thereafter, the prices generally moved up and at the end of the year the quotation was Rs. 20 per maund.

Groundnut oil moved in sympathy with kernels. Thus in Bombay the prices ruled between Rs. 31-10-0 per maund and Rs. 34-14-0 per maund during the period January to May, 1955. During the next two months, viz. June and July, the prices of groundnut oil again advanced to Rs. 38-9-0 per maund. In August and September, prices fell to Rs. 38-9-0 per maund but during the last quarter of the year they witnessed a spurt and at the end of the year were quoted at Rs. 42-8-0 per maund. A similar trend in the prices of groundnut oil was exhibited at Madras, though the range in the prices was smaller as compared to Bombay. During the year, groundnut oil prices at Madras ruled between Rs. 31-10-0 and Rs. 35-6-0 per maund.

RAPE AND MUSTARD

In line with the prices of groundnut, the rape and mustard prices declined during the period January to April, 1955. The index number of the wholesale prices for rape and mustard fell by 143 points from 443 in January to 300 in April, 1955. In May and June, the index improved to 313 and 325 respectively and gained another 56 points during the month of July. In August and September, however, the index fell to 371 and 356 respectively. As a result of the general rise in the prices of vegetable oils coupled with expectations of a shortfall in the production of rape and mustard seed, the prices recovered during the last quarter of the year. Between October and December, the index rose by 55 points to 411. Rape seed of yellow variety at Bombay was quoted at Rs. 23-12-0 per maund in January but declined to Rs. 16-14-0 per maund in May. During the remaining seven months of the year, the prices fluctuated within a narrow range and towards the end of the year, the quotation stood at Rs. 17-8-0 per maund. A similar trend was exhibited by mustard seed prices at Calcutta and Kanpur.

Mustard oil at Calcutta fell by Rs. 19 per maund in April to quote at Rs. 43 a maund. During the rest of the year it fluctuated between Rs. 44 and Rs. 53 per maund. Towards the end of the year, there was a distinct upward trend in the mustard oil prices mainly due to a short fall in the production of mustard seed. A different behaviour of mustard oil prices was witnessed at Kanpur; there, the year-end quotation was Rs. 51-8-0 per maund as compared to Rs. 55 per maund at the beginning of the year.

SESAMUM

The production of sesamum in 1954-55 was 5.89 lakh tons as against 5.54 lakh tons in 1953-54 and 4.64 lakh tons in 1952-53. The comfortable supply position resulted in easy price situation throughout the year 1954 which continued during the first 4 months

of 1955 also. During the remaining part of the year the prices registered rather a sharp increase. Sesamum seed fell by 23 points to touch the low level of 304 in April, 1955. During the remaining months, the index rose by 186 points and stood at 490 towards the end of the December, 1955. The main reason for the rise in the prices of sesamum seed was the expectation of a lower crop during 1955-56 season. At Kanpur, sesamum seed declined from Rs. 18-8-0 per maund in January, 1955 to Rs. 16 per maund towards the end of April but during May and June the prices improved by Rs. 5-0-0 to Rs. 21-0-0 per maund. During the next six months, the prices fluctuated between Rs. 21-0-0 and Rs. 23-4-0 per maund. At Bombay, the trend of the prices was generally upward, and towards the end of December, 1955, the quotation for sesamum seed was Rs. 30-10-0 per maund as against Rs. 18 per maund in January of the same year.

Sesamum oil showed more or less a similar trend as that of seeds. The price of sesamum oil which at Kanpur was Rs. 34 per maund in January declined to Rs. 33-8-0 per maund by April. During the remaining period of the year it improved by Rs. 13-8-0 per maund to Rs. 47 per maund in December, 1955. Bombay market was, however, firm throughout the year and at the end of the year, sesamum oil was quoted at Rs. 52-14-0 per maund as compared to Rs. 32-6-0 per maund in January.

LINSEED

The output of linseed during 1954-55 was 3.82 lakh tons which was slightly higher than in the previous year. As in the case of sesamum, linseed prices in the country declined during the first four months, showed a rising trend thereafter and towards the end of the year ruled at high levels. The Wholesale Prices Index fell from 335 in January to 315 in April and then moved up, with slight set-backs during August-October, to 422 in December, 1955. At Bombay linseed prices declined from Rs. 16-8-0 per maund in January to Rs. 15-11-0 per maund in March. During the next four months the prices improved to Rs. 19-5-0 per maund in July, 1955, and despite a slight set-back in August and September, continued to move up to Rs. 21-10-0 per maund in December. At Calcutta and Kanpur, the prices exhibited an identical trend. In the case of Calcutta linseed prices ranged between Rs. 15-10-0 and Rs. 22-12-0 per maund, while at Kanpur they ruled between Rs. 13 and Rs. 20-8-0 per maund.

Linseed oil at Bombay and Kanpur exhibited an erratic trend with an upward tone. At these centres the quotations towards the end of December were Rs. 51-12-0 and Rs. 45 per maund as against Rs. 38-9-0 and Rs. 34 per maund respectively in January, 1955.

CASTOR

The movement of castor seed prices was similar to that of linseed. During the first five months of the year the index fell from 280 in January to 254 in May. Thereafter, the index generally moved upwards and at the end of the year the index stood at 356. At Madras, castor seed declined from Rs. 13-2-0 in January to Rs. 11-5-0 per maund in March. During the next quarter ending June, 1956, the prices ruled steady and then exhibited an upward trend. The month-end quotations for July and August were Rs. 14-15-0 and Rs. 14-6-0 per maund. During the remaining part of the year castor seed was not quoted at Madras.

CASTOR OIL

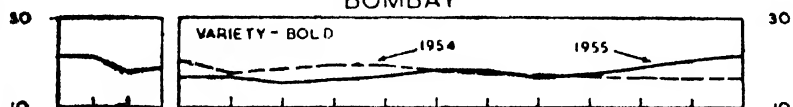

At Hyderabad castor oil declined to Rs. 20-3-0 per maund in April, 1955 as compared to Rs. 26 per maund in December, 1954. Thereafter, prices showed an upward trend and at the end of December, 1955, castor oil rose to Rs. 33-5-0 per maund. At Bombay a similar trend

was noticed. In January, castor oil was quoted at Rs. 25-12-0 per maund. It remained around that level till May, when the price declined by about Rs. 1 per maund. Hereafter, a rising tendency was witnessed and by the end of the year castor oil had gained by more than Rs. 10 per maund—the closing quotation being Rs. 36 per maund.

COTTON

The important developments during 1955 in regard to raw cotton were the sharp and continuous decline in prices that occurred during the first four months and the subsequent recovery which finally culminated into a boom towards the close of the year. The price decline was generally a part of the general recession in commodity prices that commenced early in 1954. A record output of foodgrains and commercial crops was the main initial cause for the general decline. The production of cotton during 1954-55 increased significantly by about 4 lakh bales as compared to 1953-54 and as a result, cotton prices at Bombay, which were generally firm during 1954, started declining steeply in January, 1955. Jarilla Fine which was quoted at Rs. 73-15-0 per maund in December, 1954 declined to Rs. 67-11-0 per maund in January, 1955 and further to Rs. 66-5-0 at the end of February, 1955. In view of the changed supply position of raw cotton in the country the Government had already removed all restrictions on inter-State movement of cotton in December, 1954, and suspended the quota system of allocation of raw cotton to the mills in February, 1955. But these measures had no perceptible effect on prices which continued to look downward. The price of Jarilla Fine sagged to Rs. 61-13-0 per maund at the end of March, 1955 and reached the low level of Rs. 60-15-0 in April, 1955. The Government liberalized the cotton export policy with a view to arresting this fall. Liberal quotas were released for export and the staple limit of exportable varieties of medium cotton was raised to 25/32". However, the recovery in cotton prices was slow and gradual. There was no perceptible change in the price situation in May, 1955. The reversal of the trend started in June, 1955 when Jarilla Fine was quoted slightly higher at Rs. 62-7-0 per maund. Since then cotton prices increased steadily on support of fresh export quotas released and progressive reduction in the export duty which was reduced in the first instance from Rs. 300 per candy to Rs. 250 per candy in June, 1955, and subsequently to Rs. 100 per candy in early August of the same year. After making only a nominal gain of about Re. 1 per maund in July, 1955, Jarilla price advanced appreciably and reached the level of Rs. 68-3-0 per maund at the end of August. This level was maintained during September and October. But later, consequent on reports of severe damage suffered by the standing cotton crop, there was a sharp increase in the values of cotton futures, and in sympathy cotton spot prices too made significant advances. Jarilla Fine which was quoted at Rs. 79-12-0 per maund at the end of November, 1955, reached at a peak level of Rs. 84-11-0 per maund in December, 1955. In view of the sharp rise in future prices the Government ordered the suspension of futures trading in cotton at Bombay with effect from 23rd December, 1955.

JUTE

The price of raw jute in India is a function of the supply position of raw jute in India and Pakistan on the one hand and of the world demand for Indian jute goods on the other. For the first time since the early 1952 recession, the prices of raw jute during January and February, 1955 reached the level of controlled prices during 1950-51. In fact the price of raw jute (Assam Bottom) was a little higher at Rs. 38 per maund in Calcutta market at the end of February, 1955 as against the controlled price of Rs. 35 per maund prevailing during the period July, 1950 to February, 1951. This recovery in prices during the beginning of the year 1955 was mainly attributed to the revival in the demand for Indian jute goods. The various

measures adopted by the Government to stimulate the exports of jute goods also contributed to the rise in prices from the depressed levels of the years 1953 and 1954. After February, 1955, the prices of raw jute tended to decline under the influence of the jute goods market and the speculation over the prospects of the new crop. The Assam Bottom variety which was quoted at Calcutta at Rs. 38 per maund in February, 1955, reached the low level of Rs. 25-8-0 in the last week of June, 1955. During the month of July, 1955 the Calcutta jute market exhibited a steady tone because of the reports of floods in Assam and other jute growing areas, transport dislocation and improvement in goods section of the market. In August, 1955, there was, however, again a decline in the market which was influenced largely by the devaluation of Pakistan currency on 31st July, 1955, and the persistent news of Pakistan underquoting India in the foreign markets of jute goods. A steep decline was witnessed in prices of raw jute in September, 1955, when the lowest levels for the year 1955, Rs. 23-8-0 per maund for Assam Bottom was touched. This was mainly due to absence of buying interest by mills on prospects of a large supply of crop in the coming months. The market, however, soon firmed up due to lower arrivals of raw jute into mofussil markets, reports of the reduced stocks of raw jute with the mills and the decision of the Pakistan Government to maintain minimum prices. The IJMA's announcement, by the end of December, 1955, regarding unsealing with effect from 10th January, 1956 of 2½ per cent of power-looms lying idle with the mills since 1949, also contributed towards this firm tendency in the prices of raw jute and the year closed with prices at Rs. 27-8-0 at Calcutta as against the year's opening quotation of Rs. 350.

PEPPER

During 1954, the prices of black pepper suffered an abrupt fall largely because of the growing competition from Indonesia and Sarawak in foreign markets consequent upon an increase in production in these countries. As a result of these factors, prices of black pepper at Cochin declined from Rs. 221 per maund in January, 1954 to Rs. 106-8-0 per maund at the end of December, 1954. With the twin object of improving the competitive position of our pepper in export market and of stabilizing domestic prices, the export duty on black pepper was reduced by the Government of India from 30 per cent *ad valorem* to 15 per cent *ad valorem* in January, 1955. Pepper price at Cochin reacted favourably to this step and reached the level of Rs. 122-6-0 per maund at the end of January, 1955. In February, however, there was some fall in prices, but thereafter they hardened and remained fairly steady upto June, 1955. In July, however, the trend was sharply reversed mainly as a result of a fall in prices in New York market, and pepper prices at Cochin which were as high as Rs. 164-9-0 per maund in May, 1955, and Rs. 153-2-0 in June, 1955 declined to Rs. 126-11-0 in July, 1955 and further to Rs. 102-13-0 per maund at the end of August, 1955. This led to the abolition of the 15 per cent *ad valorem* export duty on pepper with effect from the 20th September, 1956. The immediate reaction was a spurt in the prices of pepper which at the end of September were quoted at Rs. 121-2-0 per maund. However, in the context of sagging trend in exports from the country, depreciating value of pepper in foreign markets, and heavy arrivals of the new crop in domestic markets, the September level could not be sustained and prices fell to Rs. 115-1-0 per maund in October, 1955 and further to Rs. 104-1-0 per maund in November, 1955. Pepper prices continued to remain depressed during December, 1955 at the preceding month's level.

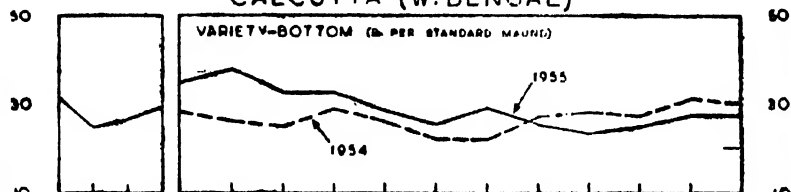

RUBBER

Raw rubber prices in India are fixed by the Government from time to time in consultation with the Rubber Prices Advisory Committee as provided under Section 13(1) of the Rubber (Production and Marketing) Act, 1947. The question of protection to rubber industry was first referred by the Government to the Tariff Board in 1951 and rubber prices

CALCUTTA (W.BENGAL)

were fixed at Rs. 128 per 100 lbs. (Group) with effect from 21st May, 1951. In May, 1952, the Government of India again asked the Tariff Commission to conduct an enquiry for fixing raw rubber prices at a level which would be fair to both the producers and the consumers. The prices fixed in May, 1951 were allowed to continue until a final decision was taken by the Government on the recommendations of the Tariff Commission in this regard. In October, 1952 prices of indigenous raw rubber were raised and fixed at Rs. 138 per 100 lbs. (Group I Rubber) with suitable differentials for other grades in pursuance of the recommendations made by the Commission. In view of the increased costs of cultivation, the Government of India decided to raise the price of rubber to Rs. 150 per 100 lbs. (Group I) with suitable differentials for other groups in February, 1955. These prices were further raised in September, 1955 when the price of Group I was revised and fixed at Rs. 155-12-0 per 100 lbs. (F.O B. Cochin) with suitable adjustments in the prices of other groups.

WOOL

The steadiness that characterized raw wool prices during 1954 continued unabated during 1955. Price movements were limited and were confined to a very narrow range. During the twelve months from July, 1954 to June, 1955 price of Jarila White variety of raw wool at Bombay ruled firm at Rs. 267-7-0 per maund throughout, without registering any fluctuation. In July, 1955 price of this variety increased to Rs. 277-11-0 per maund. This gain could be sustained only at a slightly lower level of Rs. 272-9-0 per maund during the subsequent months of August and September, 1955. Later, however, prices fell back to the original level of Rs. 267-7-0 per maund and ruled steady at that level till the end of the year. It may be added that it was mainly the stable and balanced statistical position of raw wool in the country that imparted strength and stability to raw wool prices during the year under review.

TURMERIC

A steady increase was in evidence in the prices of turmeric during 1954, which advanced progressively and reached a peak level of Rs. 82 per maund at Calcutta at the end of December, 1954, as against Rs. 50 per maund in January, 1954. Prices continued to remain at this high level during January and February, 1955. In March 1955, however, there was a significant decline to Rs. 74 per maund. Thereafter, in the remaining months of 1955, prices fluctuated within a margin. The annual average price of turmeric in 1955 was Rs. 74-1 7 per maund as against Rs. 59-8-8 per maund in 1954.

TEA

According to the estimates of the Tea Board, production of tea in 1955 reached an all-time record and stood at 664·6 million lbs. as against 644·4 million lbs. in the preceding year. The increase in production was made possible partly by improved methods of cultivation, intensive manuring and favourable weather conditions. More attention was paid to cultivation of quality tea which commands a better market in foreign countries. The export duty on tea was raised from 7 as. per lb. to 10 as. per lb. in January, 1955. By the Finance Act. of 1955, the Government introduced a new scale-rate of duty by which the duty was made to rise or fall in accordance with the price of tea. The minimum duty in the scale was fixed at 4 as. a lb. applicable when the price of tea did not exceed Rs. 2-8-0 a lb. while the maximum duty of 12 as. a lb. was to be applicable when the price of tea exceeded Rs. 4-12-0 a lb.

The high prices of tea realised in 1954 continued in the beginning of 1955 also largely because of the increasing consumption of tea all over the world and a feeling that World demand would out-pace World supply. In London auctions in January, 1955, common Indian teas were sold at a high level of 7 sh. per lb.; but, when it became clear that the production of tea in the major producing countries had registered a significant increase the prices started declining and by May, common teas were fetching 3 sh. 4 d. per lb. In the internal market prices of average tea were quoted at Rs. 2-8-0 to Rs. 2-8-6 per lb. in the beginning of the season. Soon, however, the internal market became saturated and common teas started declining. The market at this stage became discriminatory and good prices were paid for best liquorings, while the poorer teas were neglected. Thus while quality teas were sold at Rs. 3-4-0 to Rs. 3-6-0 per lb., common teas fetched only Rs. 1-10-0 per lb. The Government's policy was directed towards making a larger quantity of tea available for internal consumption than for sale abroad. Thus, for the first time in 1955 a ceiling was imposed on the quantity of tea that could be consigned to London for sale in the auctions.

The All-India Index of Wholesale Prices of tea which touched the peak of 808 in January, 1955, showed a gradual fall and in April declined to 508. In May, however, the index shot up abruptly to 550, but thereafter it declined gradually and touched the low level of 346 in December, 1955.

COFFEE

The internal market prices of coffee in 1955 ruled at a more or less uniform level till the month of July when some rise was noticed in Plantation Coffee. Earlier in the year there was a rise in prices of *Robusta* Coffee which continued for a short time. The prices of *Plantation* Coffee in July, and *Robusta* Coffee again in August was due partly to adjustment in releases that became necessary and partly because of some amount of pessimism in the trade circles. Further advance in prices of both *Plantation* and *Robusta* Coffee was noticed towards the close of the year under review. The prices of *Plantation* Coffee which ruled around Rs. 212-3-0 per cwt. in the first half of the year shot up to Rs. 225-15-0 per cwt. in December, 1955. Likewise, prices of *Robusta* Coffee also shot up from Rs. 147-11-0 per cwt., in June, 1955 to Rs. 165-1-0 per cwt. in December, 1955. The sharp increase in prices of coffee towards the latter half of the year was partly attributable to the revision of minimum release prices on the basis of Rs. 2-2-0 per point as against Rs. 2-1-0 per point from 1st April, 1955 and partly to the enhancement of the excise duty from Re. 1 to Rs. 2-8 per cwt. from 1st August, 1955. The All-India Index Number of Wholesale Prices of Coffee, which stood at 575 in January, 1955, increased to 615 in July, 1955 and touched the level of 616 in December, 1955.

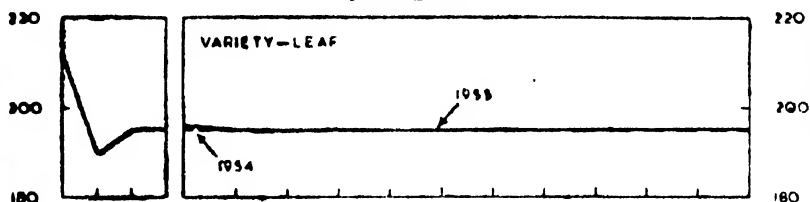

CHILLIES

According to the Final Estimate the production of dry chillies during 1955-56 was estimated at 3.4 lakh tons as compared with the partially revised estimates of 3.6 lakh tons during 1954-55, showing thereby a decline of 6.3 per cent. This shortfall in production was reflected in a high level of chillies prices at some centres during 1955. The price at Patna which was quoted at Rs. 32 per maund in December, 1954 rose to Rs. 50 per maund in March, 1955 and remained near about this level till the end of the year under review. At Calcutta, however, the trend of prices was different. The price which stood at Rs. 65 per maund in December, 1954 dropped down to Rs. 60 in January, 1955, rose again to Rs. 65 in March but subsequently, till October, the trend was rather downward. During the last two months of the year, the prices improved significantly and the closing quotation for 1955 was Rs. 65 per maund.

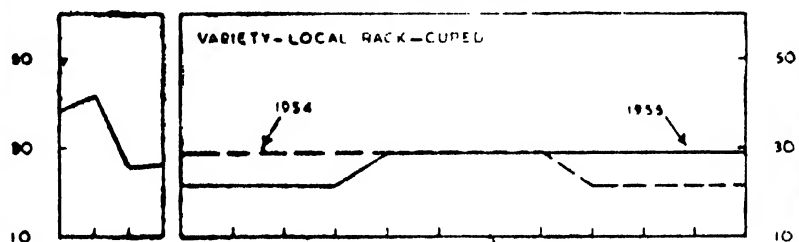

TOBACCO WHOLESALE PRICES

RUPEES PER STANDARD MAUND

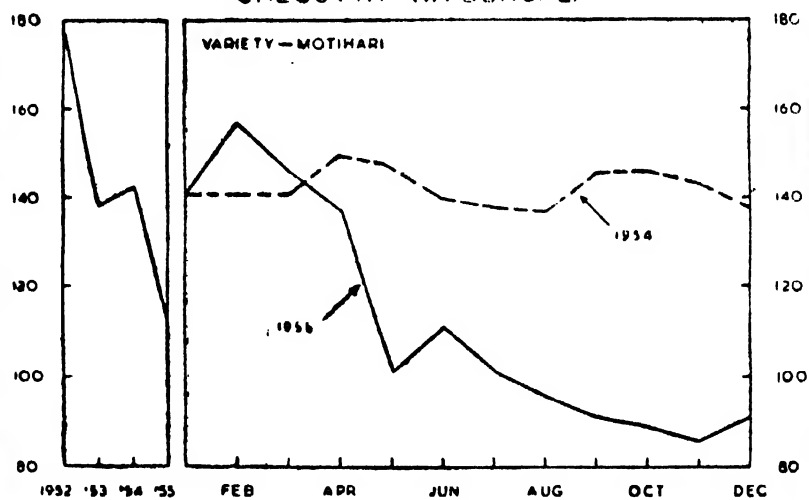

BOMBAY

GUNTUR (ANDHRA)

CALCUTTA (W. BENGAL)

TOBACCO

Tobacco prices during the year 1955 showed a declining tendency. The Economic Adviser's Index of Wholesale Prices for tobacco which stood at an average of 1001 points during 1954, declined to 749 during the year under review. In order to arrest this downward movement and to help the growers, the Government of India with effect from 14th February, 1956, allowed without any prescribed destination quota, free licensing of export of *biri*, *biri* leaf and *biri* tobacco. Export of hand-made *biris*, *biri* leaf and unmanufactured tobacco, other than flue cured used for manufacture of *biris* including tobacco flakes known as 'Patti', 'Farma', 'Bhukki', 'Tamak', 'Shuka' and tobacco in the form of whole leaf known as 'Red or Black Chopadia' also came to be licensed freely on shipping bills, without any quantitative restrictions with effect from 23rd March, 1955. There was some recovery in tobacco prices as a result of these measures. The All-India Index went up to 774 in June, but steadily moved down again. Even the shortfall in the production of tobacco in 1954-55, increased exports of manufactured tobacco and a larger quantity cleared for home consumption did not stimulate prices and the year closed with Economic Adviser's Index at 720.

ARECANUTS

The high level of prices of indigenous arecanuts which was noticed in 1954 continued during 1955, though in a somewhat milder form. The price at Mangalore which was quoted at Rs. 113 per maund in January, 1955 dropped to Rs. 105-13-0 in February. From March onwards, the prices generally showed an upward trend and touched the high level of Rs. 139-9-0 per maund in November. In December, however, the price dropped precipitately to Rs. 112-7-0 per maund—near about the level at which it stood in December, 1954. An important event during 1955 was the reduction in the import duty from Rs. 1-0-6 to Re. 0-12-6 per lb. (standard) and from Re. 1 to Re. 0-12-0 per lb. (preferential) with effect from the 30th April, 1955. This reduction in import duty was reflected in a fall in the price of the imported arecanuts but it did not bring about a similar fall in the case of indigenous arecanuts. The All-India Index of Wholesale Prices which at the beginning of the year was 872, rose steadily till April when it reached a peak of 891. Subsequently, till September, the Indices moved in a downward direction but improved again during the next three months and at the close of the year stood at 833.

SHELLAC

Prices of shellac in 1955 ruled at a higher level than in 1954. Prices of T. N. Shellac at the Calcutta market witnessed a sagging tendency in the first half of the year. The fall in prices, which was due to reports of a good Baisakhi crop continued till June, 1955, when prices fell to Rs. 126 per maund. However, prices in July advanced to Rs. 138 per maund and remained stable at Rs. 135 per maund during the next two months. In October and November there was again a sharp rise due to good foreign demand and the price advanced to Rs. 161 per maund in November, 1955. Towards the end of the year, prices received some set-back and T. N. Shellac at Calcutta in December, 1955 was quoted at Rs. 153 per maund.
